

# Welcome to Florida ProShield. Protecting your family's sanctuary.

Your home should be your family's safest place. We help you ensure the air they breathe is pure, healthy, and perfectly balanced.

## **Carbon Dioxide (CO<sub>2</sub>): Stale air equals tired kids and lack of focus.**

High CO<sub>2</sub> levels can silently drain your family's energy and concentration. We inspect your home's breathing ability to keep everyone sharp and awake.

# Hidden Chemicals (VOCs): Everyday items releasing invisible gases.

Normal household items and cleaning supplies can release invisible gases that cause unexplained headaches. Our Inspection effortlessly uncovers these hidden culprits.

## Humidity & Temperature: The perfect balance to stop airborne irritants.

Too much indoor moisture allows microscopic contaminants to thrive and trigger allergies.

We map your home's climate to find the exact sweet spot for healthy lungs.

# ProLab: Scientific certainty for microscopic allergens.

We partner with ProLab for elite, professional analysis of your indoor environment. Enjoy total peace of mind knowing exactly what your family is inhaling, backed by pure science.

Step 1

Step 2

Step 3

A smart home sensor device is placed on a wooden shelf in a living room. The room features a bookshelf with books and decorative items. A large window in the background shows a view of green trees and a night sky with a crescent moon and stars. A glowing orange wave graphic is overlaid on the scene, passing through the sensor device. The overall atmosphere is warm and modern.

## Continuous Monitoring: Tracking your home's true breathing rhythm.

A single snapshot isn't enough. Our sensors track your air over several days to capture your family's true, everyday living environment.

# Schedule your family's Air Quality Inspection today.

Give yourself the ultimate gift of peace of mind.
