

Welcome to Your Sanctuary

- Our experts arrive with total respect for your home and family.
- We conduct a quiet, non-invasive Inspection to keep your daily routine completely undisturbed.

Step 1: The Visual Assessment

- Scanning your home for hidden moisture.
- Pinpointing the hidden sources of microscopic contaminants.
- Identifying exactly where airborne irritants thrive.

Step 2: Smart Tech Deployment

We place precision smart sensors to track your home's air quality in real-time. This continuously monitors your family's environment for invisible factors like CO2, humidity, and microscopic contaminants.

Step 3: Precision Air Sampling

- We capture targeted air samples from your most lived-in spaces.
- These specialized tests catch the invisible airborne irritants that standard cleaning simply misses.

Step 4: Scientific Lab Analysis

Your samples are sent to our official laboratory partner, ProLab, for rigorous scientific testing. Their experts identify **invisible allergens** and **microscopic contaminants** with absolute certainty.

PRO-LAB®

Step 5: The Results & Action Plan

- A clear, easy-to-read breakdown of your indoor air.
- Absolute peace of mind backed by lab-certified science.
- A customized, step-by-step plan to protect your children's health.

Protect Your Family's Air Today

Give your children the clean, safe air they deserve to breathe every day. Contact Florida ProShield to book your professional home Inspection today.
